

## Roaming Partners

★Please refer to company names and services which you have contracted.

★LTE (2.1GHz (B1) / 800MHz (B19) / 1.5GHz (B21) / 700MHz (B28) / 3.4GHz (B42) / 1.8GHz (B3)) capable devices are required, and VoLTE capability is mandatory for voice services.

Devices must conform to Japanese technical standards (through Certification of Conformity with Technical Regulations or Certification of Construction Type) or be confirmed as compliant in a foreign country whose regulations conform to the technical standards specified in Recommendation ITU-R M.1457.

★Foreign radio stations which are approved to be used by DOCOMO's roaming partners on their network do not require additional Japanese license as mandated by relevant authorities when using in DOCOMO's network, as long as the contract on the foreign radio station is valid. However, mobile telephony service may not be used depending on radio stations for various reasons, including cases when communication system supported by the radio station is incompatible with the system provided by DOCOMO's network.
